Variables Expectations (EVE)

One of the fundamental objectives of the Central Bank of Paraguay (BCP for its Spanish acronym) is to preserve and ensure the stability of the currency. To accomplish this, the BCP implements an “Inflation Targeting” scheme since 2011, which is aimed to maintain expectations of the economic agents around the inflation target. Therefore, building indicators capable of measuring and synthesizing expectations of the economic agents complements the necessary information for the effective implementation of the monetary policy.

In this regard, the BCP, following the best practices of central banks, monthly prepares the “Economic Variables Expectations (EVE)” survey, which allows knowing the forecast of the economic agents about the evolution of the main macroeconomic variables. The information is collected in a monthly basis since 2006, and it is based on a panel of respondents who are representatives of the most important economic sectors.

What is EVE survey?

It is a survey made by the BCP that summarizes expectations of the economic agents regarding main economic variables for different times periods: the end of both the current month and following month, the current year; the next 12 months of the following year and for the horizon of Monetary Policy (around 18 and 24 months).

Which are the surveyed economic variables?

Survey questions are divided into four main groups including inflation, US dollar nominal exchange rate, GDP growth and monetary policy interest rate.

Who are the respondents?

The survey is carried out to a representative panel of the main economic sectors such as banks, financial institutions, credit rating agencies, brokerage firms, consulting firms, independents analysts and economic organizations.

What are the results used for?

The results allow the BCP to collect expectations of the main economic agents. These reflect the degree of confidence in the economy and the implemented monetary policy. Also, the results complement a set of information analyzed in the monetary-policy decision-making process.

Current month results

VARIABLES	May Expectations
Inflation (CPI Percentage Change)	
Monthly (May 2024)	0.6%
Following month (June 2024)	0.4%
Year 2024	4.0%
Year 2025	4.0%
Next 12 months (May 2025)	4.0%
Monetary Policy Horizon (May 2026)	4.0%
Nominal Exchange Rate ₺/USD	
Monthly (May 2024)	7,450
Following month (June 2024)	7,450
Year 2024	7,500
Year 2025	7,500
GDP (Percentage Change)	
Year 2024	3.8%
Year 2025	4.0%
Monetary Policy Rate (MPR)	
Monthly (May 2024)	6.00%
Following month (June 2024)	6.00%
Year 2024	5.50%
Year 2025	5.13%

Source: BCP based on EVE survey.

According to May EVE survey results, economic agents expect the inflation to be 4.0% for both the end of 2024 and the end of 2025. For the next 12 months agents expect inflation to be 4.0% and for the Monetary Policy Horizon (around 18 and 24 months), agents expect inflation to be 4.0% as well.

For the current month, the median monthly inflation expectation rate is 0.6%, higher than the expectations registered on the same month of the previous year (0.3%) and higher than the April expectations for May (0.4%). Similarly, for June 2024, economic agents expect the monthly inflation to be 0.4%. The average monthly inflation expectation is 0.6% for May 2024.

Regarding the exchange rate ₺/USD evolution, the economic agents' expectations for May 2024 is ₺/USD 7,450 (higher than the reported on previous month for the current one, ₺/USD 7,320). The nominal exchange rate is expected to be ₺/USD 7,450 for June 2024. By the end of 2024 economic agents expect the nominal exchange rate to be ₺/USD 7,500 and by the end of 2025 they expect it to be ₺/USD 7,500 as well.

Regarding the median economic growth rate, respondents expect a rate of 3.8% for 2024 and a rate of 4.0% for 2025.

Concerning to the Monetary Policy Rate (MPR), economic agents expect it to be 6.00% for both May 2024 and June 2024. Agents expect this variable to be 5.50% by the end of 2024 and 5.13% by the end of 2025.
